

Service Work Instruction	
<b>KHC00003X to KHC00003X-CV</b>	Approved by: <b>John Jennings</b>

**Service and spare parts use of KHC00003X-CV in place of KHC00003X**

As part of a product improvement the kwicova sheeter hydraulic cylinder part number KHC00003X has been replaced with an updated system replacement part number KHC00003X-CV.

This cut in to new builds as of March 2020 on all hook loaders.

The new system replacement hydraulic cylinder part number KHC00003X-CV has additional pipe work which incorporates hose burst protection.

The new system is cross compatible with the earlier design with the addition of the 1/4bsp-1/4bsp adaptor/restrictor part number 203972 and dowty washer part number 10862

1/4bsp-1/4bsp adaptor/restrictor and dowty washer 10862

Please find pictures of the early design and the later design hydraulic cylinder set up.

Design to March 2020

Design from March 2020

Information relating to this new part introduction.

- The new design can be fitted to all current and existing vehicle with no modification to pipe work.
- Customer are to be sold KHC00003X-CV with 2x 10862 and 2x 203972 only from the 15<sup>th</sup> of September 2020.
- The cylinder KHC00003X-CV should retain the burst valve protection when fitted and boughton employees should advise use in this format only. Alterations from this are at the digression of the customer. This information can be forwarded in support.
- Fitment of the KHC00003X-CV should be fitted in pairs unless there is clear customer sign off that the burst valve safety can be removed. Engineers paper work should reflect this sign off.
- We are working to release the burst valve and pipework to retrofit to KHC00003X to reduce customer cost.
