Air transportability trial

Oldbury designs and manufactures complete mobile systems incorporating Oldbury engineered solutions, for example:-

- Specialised trailers
- Militarised Generators from 7 KVA to 20 KVA
- Air conditioned cabins
- Lifting systems
- Manual handling equipment
- Sand filtration for generators, air conditioners and power systems
- Penthouse annexes for equipment protection
- Solar shielding

Oldbury also modifies and upgrades vehicles for customers' requirements such as:-

- Weight saving
- Cost saving
- Safety
- Human factors
- Weight distribution
- Air, Sea, Rail Transportability
- Ruggedised and hardened systems operating in extreme environmental conditions

Through Life Support (TLS) is offered on all projects either 'In-House' or with partnering TLS suppliers.
